

## Opti-Lube Soda Based Block Grease

### Features:

- Special Wear Reducing Formula
- Helps Components Run Cooler
- Uniform Consistency & Hardness
- High Melting Point Reduces Waste
- Long storage life

| Typical Properties                     | ASTM Test Method | Specifications |
|--|------------------|----------------|
| Soap Type                              |                  | Soda (Sodium)  |
| Appearance                             | Visual           | Dark Gray      |
| Texture                                |                  | Solid          |
| Mineral Oil Viscosity                  | SUS @ 210° F     | 55-65          |
| Penetration @ 77° F, worked 60 strokes | D217             | 18-22          |
| Dropping Point, F°                     | D566             | 360            |
| Melting Point, F°                      |                  | 350            |
| Flash Point, F°                        | D92              | 375            |
| NLGI Grade                             |                  | 8+             |
